

Physics

My daughter excelled in Physics
I asked her what is it
Science? Math?
What?
She told me in the simplest terms
It's the study of things in motion
My father must have
Known a thing or two
About physics
When he was teaching me
How to drive
He said
If you know you are going
To crash head on
Floor it
The slower car
Will receive the most damage
Physics is a guide
to survival
